

Steps to installing the Maryland Grazing Plan Template into the MD C-Graz Program

1. Be sure you have the C-Graz program loaded on your machine.

Go into start on your machine and go into programs and look for this Icon and click on it to open C-Graz.

C-graz.lnk

After seeing it is loaded, exit the program.

2. Go to the zip file each sent to you as an e-mail attachment or from the web site below:

http://www.esri.sc.edu/Projects/usda/application_development/cgraz.asp

In all cases you will be opening or downloading a zip file that says,

"MDGrazingPlanTemplate.zip"

In an e-mail :

Highlight the : MD_CGrazTemplate zip file attachment

Right click

Select Open, then change from "Save it to disk" to "Open it", then click okay.

It will sit a while till the Z-file directory comes up.

In the directory right click on GrazPlan_MDexe

Select open

**You will get a message that says "This file has a potential unsafe file type of EXE."
Click YES**

It will say: "Self extracting file will unzip and place the Md grazing Template into the correct file location for C-Graz to call it up ."

Click Okay

Click on unzip

It MAY ask to overwrite the template file if you have one already in. Click YES.

It will say files unzipped successfully. Click ok

Then close just that small window (WinZip Self-Extractor) NOT the Z-file-Main Directory window.

It will return to the Zip file directory of files

Then double left click on second file, Template Instr.doc (word file) and do file, save as and save it where you can find it again. (This has the instructions on inserting C-Graz tables into the MD-C-Graz grazing plan template.)

NOW close the zip file. The MD grazing plan template is permanently loaded. Use the Template Instr.doc instructions to call up the template in C-Graz and install C-Graz calculated data and save the complete plan. Follow the instructions first saving the benchmark and then saving the selected alternative you developed.

You will repeat the process for future updates just select the overwrite option when asked in the process.

If you have problems contact Elmer at: 443-482-2922

**Or the C-Graz help desk - real live people that answer the phone most of the time.
