

**§WA536.20 Design Criteria for Reinforced Concrete.**

(e) Waste Storage Structures – Interim Design Criteria.

- (1) In accordance with Practice Standard 313, the “Building Code Requirements for Structural Concrete” (ACI 318-05) shall be used for the design of all reinforced concrete structures. Waste storage structures containing liquids shall also meet the requirements of “Code Requirements for Environmental Engineering Concrete Structures” (ACI 350-01) and as applicable, “Seismic Design of Liquid-Containing Concrete Structures” (ACI 350.3-01).
