

Helpful Hint—Prepare to Use the Soil Data Viewer

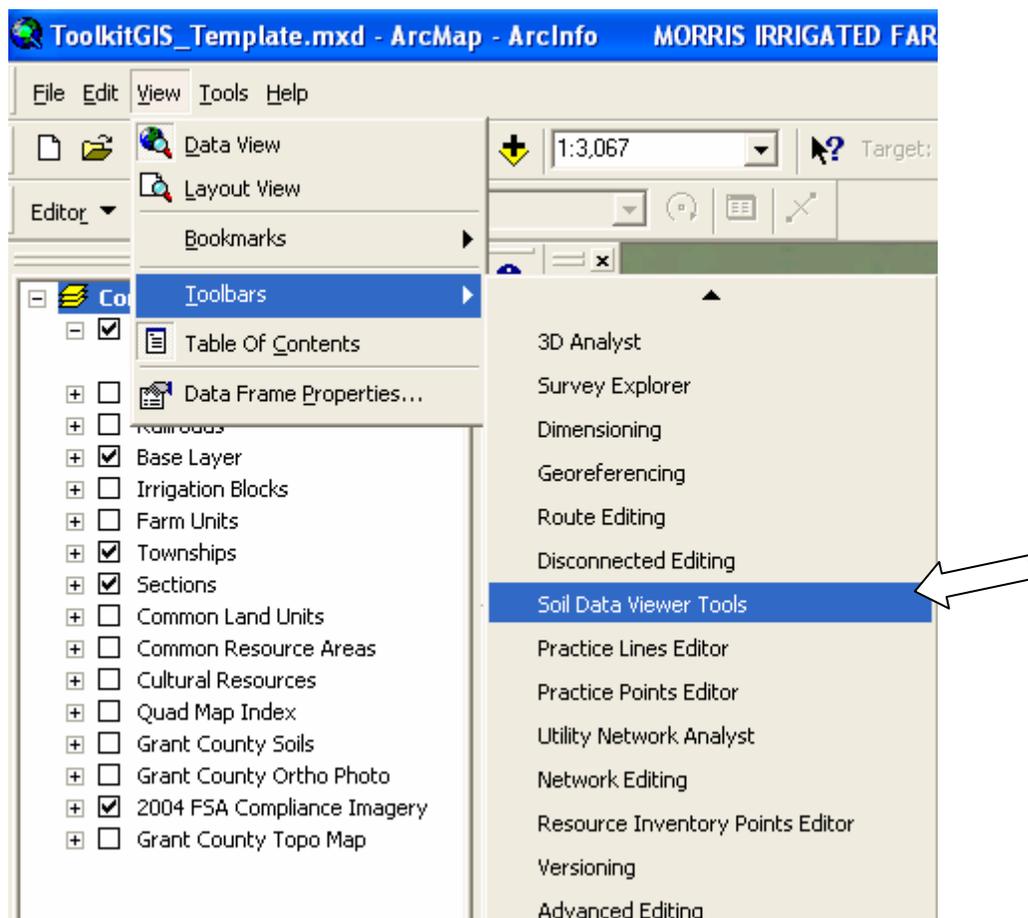

Applies to Version:	Toolkit 5.2, SP-2
Written by:	June Johnson Washington NRCS Toolkit Coordinator
Helpful Hint Date:	02-08-2006

Background:

The Soil Data Viewer that is compatible with ArcGIS 8.3 recently became available and was installed at the same time as Toolkit 5.2, SP-2. To make Soil Data Viewer available for use in ArcGIS, the user must add the Soil Data Viewer toolbar. 🗺️

Instructions:

1. Start ArcMap from the Customer Folder Tab.
2. In ArcMap, go to the View menu, scroll down the list and click on Soil Data Viewer Tools.

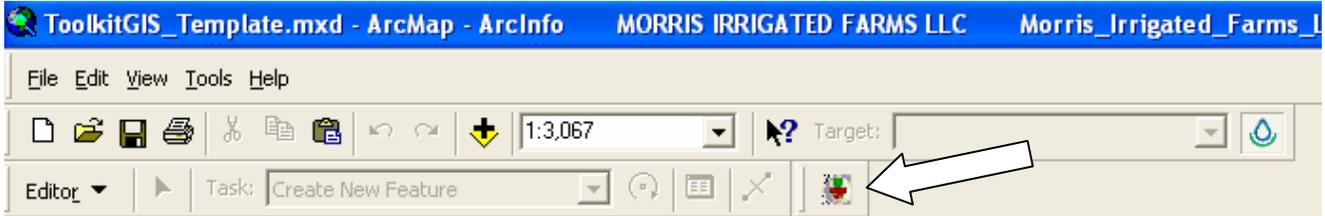

3. On the Customize screen, scroll down the list to find Soil Data Viewer, click in the box beside it to put a checkmark in it. This will result in a Soil Data Viewer icon to be opened on the screen.

4. Drag this icon up to your task bar and dock it.
