

Helpful Hint—ArcGIS Software Product to Use for Toolkit

Applies to Version:	Toolkit
Written by:	June Johnson Washington NRCS Toolkit Coordinator
Helpful Hint Date:	Revised 7/28/2009

PURPOSE

Some Toolkit ArcGIS users have found that the ArcGIS software is not configured correctly for Toolkit. These instructions will explain what to look for and how to change it.

INSTRUCTIONS

When ArcMap is started, look at the title bar at the top of the page. What does it say? Toolkit uses either the ArcMap - ArcInfo or ArcMap - ArcEditor configuration. Here in Washington, we prefer ArcMap - ArcInfo.

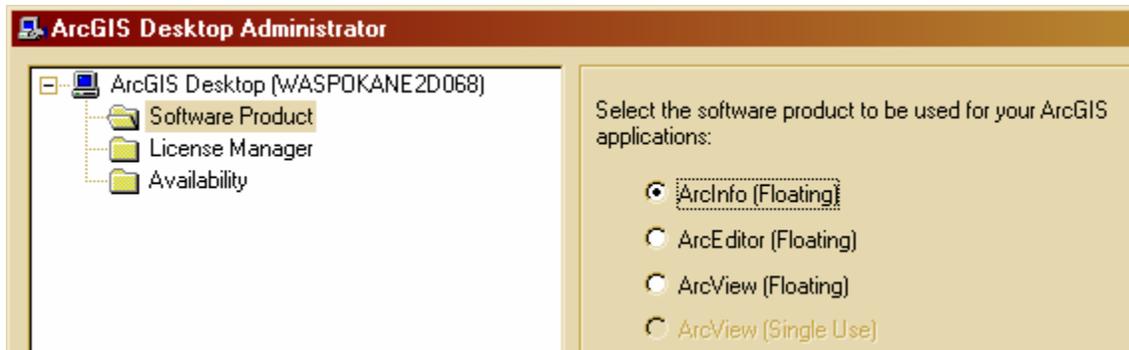

If the title bar has ArcView in it,

Go to Start > All Programs > ArcGIS > Desktop Administrator. Select Software Product.

Select **ArcInfo (Floating)** and click OK.

In Toolkit, go to Preferences, and Save the GIS Preferences.
