**WILDLIFE HABITAT INCENTIVES PROGRAM
FY2010 Eligible Practices and Practice Hold-Downs
CENTRAL AREA - WASHINGTON STATE**

Footnotes:

1/ The practice Hold Down is the maximum amount of cost-share for the total units of the practice scheduled in the WHIP Conservation Program Agreement.

2/ These practices are eligible only if needed in support of the implementation of a Fish Passage (396) or Stream Habitat Improvement & Management (395) project.

3/ These practices are eligible only if needed to provide a replacement source of water for livestock that will be excluded from direct access to a significant riparian water source (stream, spring, pond, or lake) in order to directly benefit fish or wildlife species.

4/ This practice is eligible only if needed in support of a Wetland Enhancement (659) or a Wetland Restoration (657) project.

Fund pool management: State guidance will be followed if re-allocation of the 12.5% percent Tribal pool is necessary. The Central area will allocate 50% of the funds to the Agricultural Pool and 37.5% to the Forest pool. Any funds left over after initial allocation will be used in the remaining pool(s) at a percent equal to the remaining unfunded applications within each pool. In order to be considered for funding, eligible applications must score local resource points and treat at least one of identified priority wildlife resource concerns.
