Estimates may not total because of rounding.

* The error referred to in the table is the standard error of the estimate.

(To obtain the margin of error at the 95% confidence limit multiply the error by 1.96.)

Geographic Area of the Southeast Team of Washington State:

Adams Garfield Walla Walla
Asotin Lincoln Whitman
Columbia Spokane

Southeastern Washington had the most stable land use patterns in the state in the 1982 to 1997 period. Most of the land is used for the production of dryland wheat or native grasses for livestock. Urban growth is increasing around the major population centers and some smaller communities are declining.
