

PART 512 - CONSTRUCTION

SUBPART E – EQUIPMENT, RECORDS, AND COORDINATION

WA512.41(e)

WA512.41 Records

- (d) For Engineering Job Class I through IV practices that are inspected by NRCS, the use of NRCS-CPA-6 is adequate for construction documentation. A bound Job Diary may be needed to document construction quality assurance activities for any Job Class I through IV practice that:
 - (1) requires a WDOE Dam Safety permit or other significant local or state agency permit;
 - (2) failure of the installed practice will be hazardous to life and/or the environment;
 - (3) the person with the design approval authority determines that the project is significant or unusually complex.
- (e) For waste storage ponds meeting the criteria of the WA DOE Dam Safety – USDA NRCS Memoranda of Understanding, additional requirements for record keeping may be required by the agreement or standard plans. Job diaries shall be used and include specific reference to those items including tests and photographs documenting construction.
