Footnotes:

1/ The practice Hold Down is the maximum amount of cost-share for the total units of the practice scheduled in the WHIP Conservation Program Agreement.

2/ This practice is eligible only if needed to control livestock access to plantings, wetlands, and riparian areas. The fence must be installed adjacent to such areas, or near enough to provide the intended protection to the habitat, without creating a potential to use the land as a separate grazing pasture.

3/ These practices are eligible only if needed to provide a replacement source of water for livestock that will be excluded from direct access to a significant riparian water source (stream, spring, pond, or lake) in order to directly benefit fish or wildlife species. In the East Area, only perennial water sources will be considered significant, and eligible for these practices.

4/ This practice is eligible only if needed in support of a Wetland Enhancement (659) or a Wetland Restoration (657) project.
