

TECHNICAL NOTES

USDA-Natural Resources Conservation Service
Boise, Idaho

TN RANGE NO. 69

January 1998

The attached Range Technical Note No. 69, "Inventorying, Classifying, and Correlating Juniper and Pinyon Communities To soils in Western United States", is to provide guidance for the inventory, classification, and correlation of Juniper and Pinyon ecosystems into ecological sites. This should be used during all progressive soil surveys and during ecological site description development or revision.

File this in the Range section of the Technical Notes, Section VI of the Technical Guide.
