Learn how to farm in “nature’s image” by applying agro-ecology principles to your land

Topics:

- Demonstration of soil structure
- Changing the way we view soils
Lunch on your own
- Cover crops in Idaho
- Soil chemistry - the living soil

Speakers:

- Ray Archuleta**, Soil Health Specialist / Agronomist, NRCS National Tech Center
- Dr. Rick Haney**, Soil Scientist, USDA-Agricultural Research Service
- Marlon Winger**, State Agronomist Idaho NRCS

Are your soils healthy?

Healthy soils -

- Have increased fertility, structure, and biological diversity
- Resist wind and water erosion
- Improve water infiltration rates
- Reduce fuel, fertilizer, and pesticide costs
