Pacific Northwest Handbooks for Weed and Insect Management

The Pacific Northwest Weed Management Handbook and the Pacific Northwest Insect Management Handbook are updated annually. The most current versions are available online at:

<http://weeds.ippc.orst.edu/pnw/weeds>

<http://insects.ippc.orst.edu/pnw/insects>

The handbooks are designed as a quick and easy reference to aid in the selection of the appropriate tools to manage weeds and pests in various cropping systems and situations in Oregon, Washington and Idaho. The handbooks are NOT intended as a guide to pesticide use. Referenced chemicals and products may not be currently registered in Idaho for the recommended use.

Remember, NRCS does not make pesticide recommendations. Any use of a pesticide contrary to the label specifications is illegal.
