NATIONAL FOOD SECURITY ACT MANUAL
180-V NFSAM
Idaho Notice No. 20

Subject: National Food Security Act Manual, 4th Edition, Parts 514 - 516

Purpose: NFSAM guidance

Effective Date: Upon receipt of this notice

Recently, new updated portions of the National Food Security Act Manual (NFSAM) related to wetlands, (including Part 514, 515 and 516) were distributed.

Several wetland labels used in prior manuals will not be used in the future. Wetland labels for **Commenced Conversion (CC), Converted Wetland Non-agricultural Use (CWNA) and Not Inventoried (NI) will not be used** on any new certified wetland determinations.

Old determinations with these symbols will be maintained and Farm Service Agency (FSA) will transfer them using the new symbology on their wetland points Geographic Information System (GIS) layer.

The new parts can be accessed under the Management section of my.NRCS through the link provided below or by using eDirectives/Manuals/180/National Food Security Act Manual.

For further information/clarification, contact the appropriate Area or State Office specialist concerning the wetland provisions of the NFSAM.

A handwritten signature in black ink that reads "Rick Noble".

RICK NOBLE
Acting State Conservationist
