USDA-Natural Resources Conservation Service
Boise, Idaho

TN WATER QUALITY NO. 3

September 28, 2000

The attached document, "Waterborne Pathogens in Agricultural Watersheds", is provided for the use of field office staff and partners to provide an introduction to waterborne pathogens associated with streams, canals and groundwater. This material was prepared by Barry H. Rosen, NRCS, Watershed Science Institute.

File this in the Water Quality section of the Technical Notes, Section VI of the Technical Guide.
