

Range Enhancement Bundle – BRA04

Range Enhancement Bundle #4

This bundle of enhancement activities includes ANM18 Retrofit Watering Facility for Wildlife Escape, ANM27 Wildlife Friendly Fencing, ENR03 Pumping Plant Powered by Renewable Energy, PLT02 Monitor Key Grazing Areas to Improve Grazing Management, and WQL01 Biological Suppression and Other Non-chemical Techniques to Manage Brush and Herbaceous Weeds.

Land Use Applicability

Rangeland

Benefits

This bundle of enhancements is focused on activities to improve wildlife habitat on rangelands by modifying fencing and watering facilities to accommodate wildlife needs; improving rangeland forage by monitoring key areas and treating undesirable brush and herbaceous weeds; and using alternative energy sources to provide water to livestock and wildlife. Implementing these activities together creates a synergy that should result in more conservation benefits than might be expected from the individual activities. Applicants that choose to implement this bundle of activities will receive an increase in ranking and payment points.

Rules for Enhancement Activity Bundles

- All of the activities in the bundle must be implemented. However, if an applicant has already implemented 1 or 2 of the activities, they are still eligible for the bundle and only need to implement the remaining 3 or 4 activities.
- Applicants will be required to install all enhancements in the bundle wherever they are needed on the applied area.
- Other enhancements cannot be substituted for those in the bundles.
- Applicants can choose how many acres of their operation they want to implement the bundle on. However, if the applicant chooses to implement the activity on only a portion of their operation their ranking points and payment points will be reduced.

Criteria

Follow the criteria in the respective enhancement activity sheets to implement each enhancement.

United States Department of Agriculture
Natural Resources Conservation Service

2011 Ranking Period 1
