Water Quality Enhancement Activity – WQL15–Reduce the Concentration of Nutrients on Farm by Limiting the Amount of Feed and Fertilizer Brought on Livestock Farms

ATTACHMENT A – Montana Enhancement Activity Sheet Supplement

A soil and manure analysis is required prior to spreading the manure. The manure will be applied based on the agronomic rates for the crops. A soil and manure analysis is required at least once every three years at a minimum.

Montana Documentation Requirements

1. Documentation of total feed requirements for livestock
2. Documentation of feed purchases from off farm.
3. Documentation of nutrient requirements for crops.
4. Documentation of off farm nutrient purchase.
5. **Documentation of manure and soil test and analysis.**
