

SQL08 - Montana Supplement – REVISED 2/25/2011

Intercropping To Improve Soil Quality and Increase Biodiversity – (Air Quality Enhancement Activity)

Montana Clarification

Grazing is allowed not to exceed 50 percent of the current year’s growth where a minimum of a 6-inch stubble height is maintained. Haying must leave 50 percent of biomass.

Montana Specifications

No additional specifications other than those described in the national enhancement.

Incompatible Enhancements

This enhancement may not be contracted with the following enhancements:

ANM21, ANM22, ENR08, SOE02, SQL08

Eligible Land

Cropland

Applicable Amount

25% of annually cropped acres (not hayland)

Example (Actual)

If the participant has 600 acres of cropland. The applicable amount would be 150 acres or 25%. The participant may select to grow two or more compatible crops in close proximity to mimic natural ecosystem patterns on 50 acres in year 2. The Toolkit plan will appear as the following:

	Year 1	Year 2	Year 3	Year 4	Year 5
SQL08	0	50.0 ac	0	0	0

Documentation Requirements

1. Written documentation for each year of this enhancement describing by field:
 - a. Intercropping system used
 - b. Crops planted
 - c. Seeding rates of all species**
2. A map showing fields and number of acres where enhancement was applied
3. Photographs of a representative number of fields.
4. **Documentation of grazing and haying (if any); photo or field measurements after grazing or haying has ceased.**

I acknowledge that I have read and understand all that is required for the implementation of this CSP Enhancement Activity.
