

ENR01 - Montana Supplement

Fuel Use Reduction for Field Operations – (Energy Enhancement Activity)

Montana Clarification

All field operations must be included in the RUSLE2 analysis comparing baseline and planned fuel consumption.

Montana Specifications

No additional specifications other than those described in the national enhancement.

Incompatible Enhancements

Some enhancements are not compatible with other enhancements. If you have a question, contact your local NRCS office.

Eligible Land

Cropland

Applicable Amount

Acres of cropland.

Documentation Requirements

- The present baseline fuel consumption for all field operations is calculated using RUSLE2 at the time of sign-up. This baseline is compared with fuel consumption for the planned reduced field operations, also calculated with RUSLE2. The estimated reduction in fuel use between the present and the planned must be greater than or equal to 20 percent.
- Documentation of the fields where field operations have changed.

I acknowledge that I have read and understand all that is required for the implementation of this CSP Enhancement Activity.
