

ANM24 - Montana Supplement

Upland Forest Wildlife Structures – (Animal Enhancement Activity)

Montana Clarification

Wildlife structures will be developed and maintained for at least one species or group of species native to the forest type.

Montana Specifications

No additional specifications other than those described in the national enhancement.

Incompatible Enhancements

None

Eligible Land

Forestland

Applicable Amount

Acres of forest land

Example (System)

Those acres of forest are the applicable acres. The application has 500 acres of forest, this 500 acres is the applicable acres. The land owner chooses to place this enhancement on 20 acres. 20 acres is the amount applied. The land owner will begin implementing this system in the 2nd year.

	Year 1	Year 2	Year 3	Year 4	Year 5
ANM24	0	20	20	20	20

Documentation Requirements

- 1) Identify the objectives of the treatment, i.e. what species is to benefit, what habitat feature is being addressed, how many trees will be retained for snag/den trees, how many brush piles will be created, how many nest boxes will be installed, etc.
- 2) A brief written description detailing the pre-treatment habitat conditions and post-treatment habitat conditions.
- 3) Representative digital images/photos of the structures.
- 4) Map of area indicating location and type if each structure installed.

I acknowledge that I have read and understand all that is required for the implementation of this CSP Enhancement Activity.
