

## SOE02 - Montana Supplement

### Protection of Cultural Resources – (Soil Erosion Enhancement Activity)

#### Montana Clarification

This enhancement will require a case-by-case consultation of the NRCS State Archaeologist. While the intention of this enhancement is to “plant” protective grass species to eliminate erosion in proximity to the culturally significant site, on rangeland in Montana, it is acceptable to build fence around the site to protect the natural vegetation from grazing and enhance the protective cover around the cultural site.

#### Montana Specifications

No additional specifications other than those described in the national enhancement.
