-------	---------	------

Questions:

Question Number	Question	Points
1	Will the conservation treatments in this proposed contract result in reductions of non-point and point source pollutants, such as nutrients, sediment, pesticides, or salinity in surface waters or ground waters? Will the conservation treatments reduce the amount of <b>1 pollutant</b> ?	25
2	Will the conservation treatments in this proposed contract result in reductions of non-point and point source pollutants, such as nutrients, sediment, pesticides, or salinity in surface waters or ground waters? Will the conservation treatments reduce the amount of <b>2 or more pollutants</b> ?	50
3	Will the conservation treatments in this proposed contract address resource concerns as a result in reductions of non-point and point source pollutants, <b>on-site</b> , such as nutrients, sediment, pesticides, or salinity in surface waters or ground waters?	25
4	Will the conservation treatments in this proposed contract address resource concerns as a result in reductions of non-point and point source pollutants, <b>off-site</b> , such as nutrients, sediment, pesticides, or salinity in surface waters or ground waters?	50
5	Will the conservation treatments in this proposed contract address resource concerns as a result in reductions of non-point and point source pollutants, <b>both on-site and off-site</b> , such as nutrients, sediment, pesticides, or salinity in surface waters or ground waters?	75
6	Will the conservation treatments in this proposed contract promote the proper application and management of manure or other organic residues do as not to impact surface waters or ground waters?	50
7	Will the conservation treatments in this proposed contract result in the relocation of a waste handling system out of a flood plain and comply with state regulations?	50
	<b>303d Listed or tribal designated water quality non-attainment area watershed numbers with Fecal Coliform, nitrates, etc 15020001, 15030101, 15030202, 15030203, 15020204, 15040004, 15040005, 15050202, 15060105, 15060202, 15070101, 15070102, 15080301</b>	
8	The operation lies within a 303d listed watershed or tribal designated water quality non-attainment area for fecal coliform, nitrates, etc.	50
9	The operation is within 1/4 mile from waters of the U.S.?	50
10	Will the conservation treatments in this proposed contract result in an improved waste management system in order to address written notification from ADEQ indicating the operation is in non-compliance with state waste management regulations?	50
11	Will the conservation treatments in this proposed contract result in reduction of emissions that contribute to air quality health such as particulate matter, NOx, volatile organic compounds, and ozone precursors and depleters?	50
12	Will the conservation treatments in this proposed contract result in reduction of agricultural activities that are of density, duration, and direction of movement that contribute to air quality and safety?	50
