NEW MEXICO BULLETIN NO. 210-13-06

SUBJECT: ENG – WELL FEASIBILITY REPORTS

TO: All Employees

Purpose: To provide assistance on the submission of well feasibility report requests

Expiration Date: September 30, 2013

The new EQIP contract signup period is rapidly approaching. If part of the contract will be practice 642-Water Well, a well feasibility report is required by NRCS-New Mexico policy in order to estimate the contract cost for this practice.

In trying to alleviate the backlog of requests during the signup period, please submit your Geological Assistance Request form as soon as possible. The more information you can include about nearby existing wells from the producer (depth, does it have water, replacement cause, etc.), the quicker the turn-around-time of your request. Requests are processed in the order received. If the request is for a water well in an earlier EQIP contract that will be constructed this fiscal year, please indicate this on the request so its priority can be increased.

If you have any questions, please contact Robin White at [robin.white@nm.usda.gov](mailto:robin.white@nm.usda.gov) or call Roger Ford at 505-761-4430.

A handwritten signature in black ink, appearing to read "J. Xavier Montoya", with a large flourish extending to the left.

J. XAVIER MONTOYA  
State Conservationist
