NEW MEXICO BULLETIN NO. 210-11-04

SUBJECT: ENG – WORKSTATION-NRCS UPDATES

TO: All Employees

Purpose: To notify you that the framework application version for EFT (Engineering Field Tools) 3.0.0 should have been installed on your workstations.

Expiration Date: September 30, 2011

This software works with Toolkit files and saves work in customer case files. This software includes the current version of Survey Engineering Tool (SET) which will import survey data, create a surface with contour lines allow you to perform drafting, print an 11 x 17 drawing with NRCS title block. EFT-SET is a replacement for Land Improve. In 2012, training on EFT and its modules will be developed and provided.

If version 3.0.0 is not on your workstation, contact your IT person and have it loaded.

Open EFT 3.0.0 and follow the steps illustrated in the attachment. This will load new modules and updates. It's recommended that you load SET, TDT (Terrace Design Tool) and WDT (Waterway Design Tool).

Please contact Roger Ford at (505)761-4430 if you have any questions.

A handwritten signature in cursive script, appearing to read "Dennis L. Alexander".

## Checking for Available Updates

To access the update system:

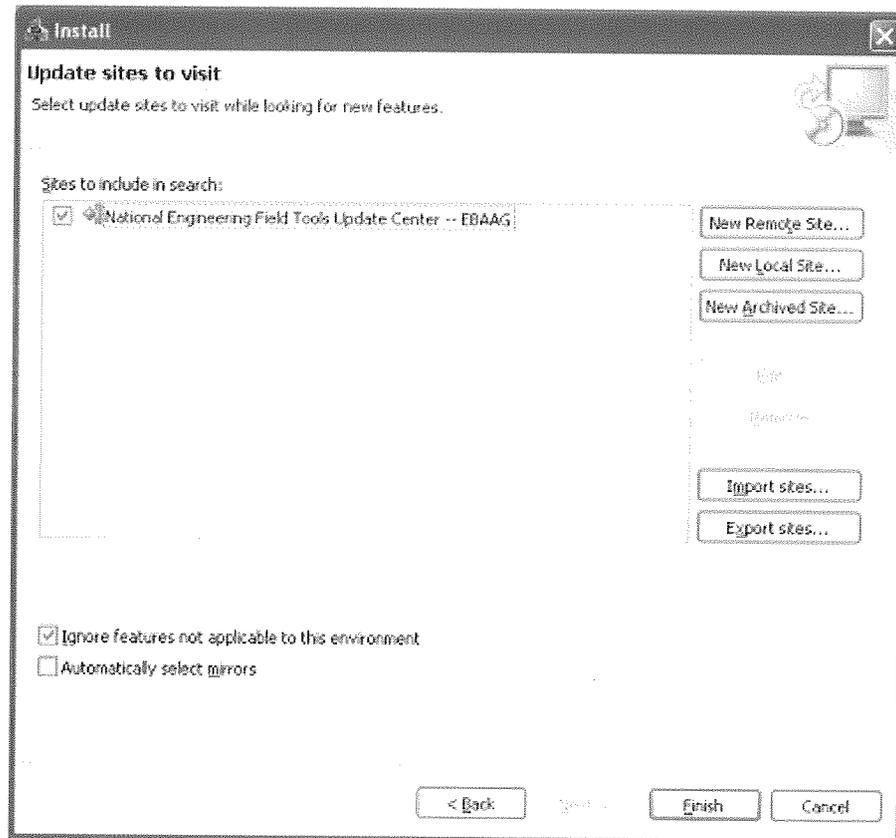

1. Start the EFT Framework.
2. In EFT, on the main menu at the top left side choose Help > Software Updates > Find and Install..., as shown in the figure below.

3. In the Install/Update wizard, select the "Search for new features to install" option as shown in the figure below. Then click Next.

4. In the Update site to visit page of the wizard, do the following (as shown in the figure below):
  - a. click the check box next to the National Engineering Field Tools Update Center -- EBAAG.
  - b. click the check box next to ignore features not applicable to this environment.

5. Click Finish
