NEW MEXICO BULLETIN NO. 210-12-07

SUBJECT: ENG – RESCIND NM-ENG-163 (WELL DRILLER’S LOG)

TO: All Employees

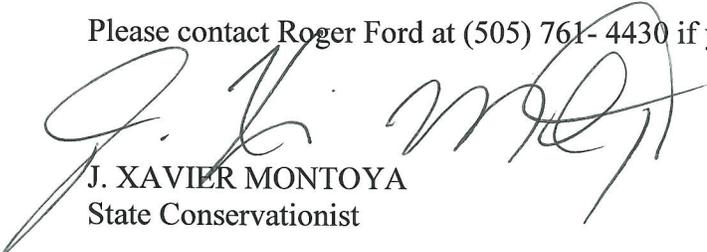

Purpose. To inform all NRCS employees that NM-ENG-163 (Well Driller’s Log) will no longer be used.

Expiration Date. September 30, 2012

NM-ENG-163 Well Driller’s Log is rescinded. All offices are to destroy all paper copies of this form and delete all electronic copies; however, completed forms that are part of a conservation or contact folder must be retained.

Well drillers in New Mexico are required to complete, sign, and file an Office of the State Engineer form. This OSE form is titled, “Well Record & Log.” The form is available on the OSE website and the NRCS-NM-Engineering Sharepoint. The OSE form provides the same information as NM-ENG-163. The OSE Well Record & Log is now required documentation for checkout and certification of the well practice.

Please contact Roger Ford at (505) 761- 4430 if you have any questions.
