

PLT18 - Increasing on-farm food production with edible woody buffer landscapes

New Mexico Supplemental Criteria

Criteria

- I. A plant list for woody riparian species (native trees/shrubs) can be found in ANM05. Use the species that are listed as having fruits or nuts (Column 10). A plant list for pollinators can be found in PLT15 that includes a few woody species.
- II. The list below includes native species that are more appropriate for upland sites. Non-native (*non-invasive*) species of fruiting trees and shrubs (such as apple, plum, apricot, Eastern red cedar, honey locust, pistachio, pecan, or piñon) would also be acceptable plantings.
