Subject: Lost River EIS comments

Below are my personal comments/questions.

1. What is the status of the 401-certification? It was in the comment stage when the ROD was revoked. Does it have to be approved before land is acquired?
2. Why is there no benefit-cost analysis for just site 16? The analysis provided is for all four dams.
3. Based on recent legislation, portions of the Lower Cove Run are considered Tier 3 segments. Has consideration been given to this? I do NOT see it mentioned in the second draft EIS.
