

Use willow or willow type adventitiously rootable stock. Material should be from an area with similar soil, climate, and location relative to the stream. The material shall be at least two years old and free of disease, rot, or insect infestation. Material shall be harvested while dormant and soaked (1 to 14 days) before installation.

Note A geotextile may not be necessary if bank material is homogenous (uniform) clay (PI>10)

Joint Planting

Rock Toe Brush Layer

Conceptual Plan - Not for Construction
