

**Notes:**

- Gabion wire shall be PVC coated.
- The length (L) of gabion mat shall be sufficient to armor toe scour without impacting gabion wall
- Gabion baskets shall be stacked so that the vertical seams are staggered between rows
- The coarse aggregate backfill shall be placed to the top of the basket before upper basket is installed
- Use standard NRCS specs for geotextile, gabion, and rock
- Further analysis required for final design

Gabion mat providing toe protection by falling into scour hole

Plan
