Benefits

This bundle of enhancements is focused on activities to improve wildlife habitat in riparian areas located on rangeland. It also seeks to improve water quality by managing livestock access to water bodies. Implementing these activities together creates a synergy that should result in more conservation benefits than might be expected from the individual activities. Applicants that choose to implement this bundle of activities will receive an increase in ranking and payment points.

Rules for Enhancement Activity Bundles

- All of the activities in the bundle must be implemented. However, if an applicant has already implemented 1 or 2 of the activities, they are still eligible for the bundle and only need to implement the remaining 3 or 4 activities.
- Applicants will be required to install all enhancements in the bundle wherever they are needed on the applied area.
- Other enhancements cannot be substituted for those in the bundles.
- Applicants can choose how many acres of their operation they want to implement the bundle on. However, if the applicant chooses to implement the activity on only a portion of their operation their ranking points and payment points will be reduced.
