# Advanced Animal Waste Storage Training – Wisconsin/Minnesota

Soil Logging – Storage Abandonment – Silage Leachate  
September – October 2011

---

---

## Who:

- Private sector engineers, TSPs and livestock expansion consultants
- Agency staff working with landowners to design and build manure storage structures.

## Field Training:

- Live backhoe and drill core (split spoon) test pits to compare how each approach shows soil-water regime and discuss soil logging techniques for each.
- Live manure storage abandonment liner examination.
- Feed leachate site evaluation or concrete manure storage inspection (site specific).

## Web Training:

- Review soil logging requirements and ASTM standards.
- Understand initial site investigation techniques to improve efficiency.
- Avoiding common manure storage design errors.
- Operation after the concrete is dry: Perspectives from a commercial manure applicator.

## DETAILS:

**September 16**      **Advanced Waste Storage Webinar**  
**9 am – 11:30**      Field training registration fee includes this webinar

**October 4**            **Field Training – Barron County, WI**  
**9 am – 3:30**           **Rick Fick Farm, Turtle Lake, WI**  
[http://conservation-training.wisc.edu/course\\_listing/list\\_sections?course\\_id=75](http://conservation-training.wisc.edu/course_listing/list_sections?course_id=75)

**October 11**          **Field Training – Shawano County, WI**  
**9 am – 3:30**          **Betley Farms, Bonduel**
