

Volunteers are always needed to help support NRCS' conservation of our natural resources. No matter what help the volunteer furnishes, it all helps the land, wildlife and our people.

An Earth Team volunteer uses a GPS unit to record stream bank erosion.

An Iraqi War veteran uses a wheel to measure a pipeline.

A volunteer works with erosion fighting marsh grass.

A volunteer removes trash from a stream in order to improve water quality.

A student volunteer holds a measuring rod used to determine slope.

Individuals

NRCS volunteers perform vital tasks in offices throughout the nation.
