

Range Enhancement Bundle –BRA07 (Addresses multiple resource concerns)

Enhancement Description

This bundle of enhancement activities includes: ANM26-Managing calving to coincide with forage availability; ANM29-On-farm forage based grazing system; PLT16-Intensive rotational grazing; WQL01- Biological suppression and other non-chemical techniques to manage brush, weeds and invasive species, and WQL13-High level IPM to reduce pesticide environmental risk.

Land Use Applicability

Rangeland

Benefits

This bundle of enhancements is focused on activities that address multiple resource concern on rangeland, e.g. forage quality, control of undesirable plants, pest management and improved wildlife habitat. Implementing these activities together creates a synergy that should result in more conservation benefits than might be expected from the individual activities. Applicants that choose to implement this bundle of activities will receive an increase in ranking and activity points.

Conditions Where Enhancement Applies

This enhancement applies to all rangeland use acres.

Criteria

Bundle rules

1. All of the activities in the bundle must be implemented. However, if an applicant is already implementing 1 or 2 of the activities, they are still eligible for the bundle and only need to implement the remaining 3 or 4 activities.
2. Applicants will be required to install all enhancements in the bundle wherever they are needed on the applied area.
3. Other enhancements cannot be substituted for those in the bundles.
4. Applicants choose the acres of their operation where they want to implement the bundle. If the applicant chooses to implement the activity on only a portion of their operation, their ranking and performance points will be reduced proportionally.
5. The amount of the bundle that can be scheduled cannot exceed the most limiting individual “system” enhancement scheduled.
