

Iowa Addendum: Animal Enhancement Activity – ANM11 – Patch-burning to enhance wildlife habitat

1. No disturbance during the nesting season from May 15 through July 15.
2. Burn management plans that impact different portions of the restored prairie at different times of the year on a rotational basis are preferred.
5. To avoid impacting the same species year after year, do not burn the same area at the same time each year.
6. Written Prescribed Burn Plan.

Certification of Enhancement Completion:

Signature of Producer	Date	Fields	Acres or Number
-----------------------	------	--------	-----------------

Include written documentation for each treatment area and year of this enhancement including:

- _____ Provide a brief statement of actions taken to native vegetation
- _____ Show dates when actions were completed
- _____ Completion of a written Prescribed Burning plan
- _____ A map showing the location of the sectored prairie
- _____ Dated photo of the area after burning
