

## **Animal Enhancement Activity – ANM23 – Multi-species native perennials for biomass/wildlife habitat**

### **Louisiana Criteria**

In addition to meeting the requirements outlined in the Enhancement Activity Sheet, species selection must emphasize native perennial species. Annual species can be incorporated in limited amounts when they add to the diversity and wildlife benefit of the planting. Suitable planting mixes will be developed that best address the management objectives of the land owner, identified wildlife species, and existing land use. **Plants selected for this enhancement should come from the Louisiana Seeding Rate Tables version 1.4.**

Refer to Plant Materials Technical Note No. 8 Retail Seed Dealers, and Plant Materials Technical Note No. 12 “Calculating Seed Mixtures – Steps to Guide You in Developing Conservation Seed Mixtures”

Follow Louisiana Practice Standards for 327, 512, and 550 for applying this enhancement.
