

Water Quality Enhancement Activity – WQL24 – Apply enhanced efficiency fertilizer products

Louisiana Criteria

In addition to meeting the requirements outlined in the Enhancement Activity Sheet, fertilizers used for this enhancement must fit in to one of the following categories:

- Ureaformaldehyde reaction products
- Isobutylidene diurea (IBDU)
- Sulfur-coated fertilizer
- Polymer-coated fertilizer
- Polymer-coated sulfur-coated fertilizers

These fertilizers are typically referred to as ‘slow-release’ fertilizers. LSU currently does not recommend any phosphorus-based enhanced efficiency products.
