

Applicant: _____

Date: _____

CROPLAND OPERATIONAL DATA	
1. Annually planted row crop acres	
a. Acres of poorly drained soils with artificial drainage that can be flooded	
b. Hayland acres (Annually planted ONLY)	
c. Acres converted from grass/legume cover (CRP or other) within the past 2 years.	
d. Other row crop acres Montana note: enter all dryland acres here	
e. Total row crop acres (This is the sum of 1a, 1b, 1c and 1d above)	
2. Acres of sod (turfgrass or seed harvest)	
3. Nursery crop acres (Ornamentals, Christmas trees, bare root, pot in pot, etc.)	
4. Hayland acres (Permanent ONLY) Montana Note: A minimum of 6 years permanent vegetation.	
5. Orchards and/or vineyard acres	
6. Other selected cropland amounts	
Linear feet of existing field borders Montana Note: Must be 30' minimum at time of application	
Linear feet of existing filter strips and riparian herbaceous cover buffers (count both sides if controlled) Montana Note: Must be 35' minimum at time of application	
Linear feet of existing riparian forest buffer(s) (count both sides if controlled) Montana Note: Must be 35' minimum at time of application	
Linear feet of ALL existing permanent fence on the land use Montana Note: Use ½ the boundary and all the interior (if applicable)	
Number of existing water facilities (do not include facilities on "other lands")	
Number of existing pumping plants	
Number of single speed electric motors (do not include headquarters or CAFO) Montana Note: These include irrigation and stock water pumps.	
Acres used to temporarily graze livestock	
Acres of existing windbreaks or shelterbelts Montana Note: Must be 60% existing live trees with a minimum of 3 rows. No fabricated structures allowed.	
Irrigated acres	
Acres of soils that were once prairie Montana Note: See CSP 2013-1 Map.	
Acres of maple trees for syrup or other cropped forest Montana Note: This will be 0	0
Acres in an organic system Montana Note: This must be a certified system	

CROPLAND OPERATIONAL DATA	
Acres in a transition to organic system Montana Note: There must be a plan	
Acres of a pilot project that meet the State defined criteria Montana Note: There are none in Montana	0
Acres of a research and demonstration project that meet the State defined criteria Montana Note: There are none in Montana	0
Acres of critical area planting needed to address a resource concern	
Linear feet of fence needed to address a resource concern	
Acres of field borders needed to address a resource concern	
Acres of filter strips needed to address a resource concern	
Linear feet of windbreak/shelterbelt establishment needed to address a resource concern	
Acres of riparian herbaceous cover needed to address a resource concern	
Acres of forest riparian buffers needed to address a resource concern	
Acres recommended for tree/shrub establishment in a forestry management plan or similar	
Number of watering facilities needed to address a resource concern	
Linear feet of road/trails/landings needed closure	
Acres of trails/landings needed to address a resource concern (for linear features assume a 15ft width * length)	
Total Cropland acres (This is the sum of 1e, 2, 3, 4 and 5)	

Applicant: _____

Date: _____

FORESTLAND OPERATION DATA	
1. Conifer acres	
a. Acres in a forestry management plan or similar scheduled to be thinned within next 3 years	
b. Acres in a forestry management plan or similar scheduled to be burned within next 3 years	
c. Total conifer acres Montana Note: Total Forest Acres offered. No minimum size for 2013-1	
2. Hardwood acres- Montana Note: None in Montana	
a. Acres in a forestry management plan or similar scheduled to be thinned within next 3 years	
b. Total hardwood acres	0
3. Mixed acres – Montana Note: None in Montana	
a. Acres in a forestry management plan or similar scheduled to be thinned within next 3 years	
b. Acres in a forestry management plan or similar scheduled to be burned within next 3 years	
c. Total mixed acres	0
4. Selected forestland amounts	
Linear feet of existing riparian forest buffer (s)(count both sides if controlled) Montana Note: Must be 35" minimum at time of application	
Number of existing water facilities (do not include facilities on "other lands")	
Linear feet of ALL existing permanent fence on the land use Montana Note: Use ½ total of boundary fence and all of interior fence.	
Acres used to graze livestock	
Acres in a transition to organic system Montana Note: There are none in Montana.	0
Acres of a pilot project that meet the State defined criteria Montana Note: There are none in Montana	0
Acres of a research and demonstration project that meet the State defined criteria Montana Note: There are none in Montana	0
Acres of critical area planting needed to address a resource concern	
Linear feet of fence needed to address a resource concern	
Acres of fuelbreak needed to address a resource concern	
Linear feet of firebreak needed to address a resource concern	
Acres recommended for slash treatment in a forestry management plan or similar	
Acres recommended for tree/shrub establishment in a forestry management plan or similar	
Number of watering facilities needed to address a resource concern	
Linear feet of road/trails/landings needing closure	
Acres of forest trails/landings needed to address a resource concern (for linear features assume a 15 ft width * length)	
Total forestland acres (This is the sum of 1c, 2b and 3c) Montana Note: There is no minimum size to the Forest land type for 2013-1	

Applicant: _____ Date: _____

PASTURELAND OPERATION DATA	
Selected pastureland amounts:	
Linear feet of existing field borders Montana Note: Must be a minimum of 30' in place at time of application.	
Linear feet of existing filter strips and riparian herbaceous cover buffers (count both sides if controlled) Montana Note: Must be a minimum of 35" in place at time of application.	
Linear feet of existing riparian forest buffer(s) (count both sides if controlled) Montana Note: Must be a minimum of 35" in place at time of application.	
Number of existing water facilities (do not include facilities on "other lands")	
Linear feet of ALL existing permanent fence on the land use Montana Note: Use ½ of the boundary and all the interior fences	
Number of existing pumping plants	
Number of single speed electric motors (do not include headquarters or CAFOs)	
Acres of existing windbreaks or shelterbelts Montana Note: Must be a minimum of 3 rows and 60% existing live trees. No fabricated structures allowed.	
Irrigated acres	
Acres of pasture <u>WITHOUT</u> a mixed stand of native grasses and/or legumes. Montana Note: This is 100% native grass with a maximum of 10% non-native legumes.	
Acres of soil that were once prairie Montana Note: See CSP 2013-1 Map	
Acres in an organic system Montana Note: This must be a certified system.	
Acres in a transition to organic system Montana Note: The acres must be in a plan	

PASTURELAND OPERATION DATA	
Acres of a pilot project that meet the State defined criteria Montana Note: There are none in Montana	
Acres of a research and demonstration project that meet the State defined criteria Montana Note: There are none in Montana	
Acres of critical area planting needed to address a resource concern	
Linear feet of fence needed to address a resource concern	
Linear feet of windbreak/shelterbelt establishment needed to address a resource concern	
Acres of fuelbreak needed to address a resource concern	
Acres of riparian herbaceous cover needed to address a resource concern	
Acres of forest riparian buffer needed to address a resource concern	
Linear feet of firebreak needed to address a resource concern	
Number of watering facilities needed to address a resource concern	
Total Pastureland acres	

Applicant: _____

Date: _____

RANGELAND OPERATION DATA	
Selected rangeland amounts	
Linear feet of existing filter strips and riparian herbaceous cover buffers (count both sides if controlled) Montana Note: The existing strips or herbaceous cover must be a minimum of 35' and no grazing is allowed on the riparian herbaceous cover.	
Linear feet of existing riparian forest buffer(s) (count both sides if controlled) Montana Note: Must be a minimum of 35" at time of application.	
Number of existing water facilities (do not include facilities on "other lands") Montana Note: Must be located on the rangeland.	
Linear feet of ALL existing permanent fence on the land use Montana Note: Use ½ of the boundary fence and the entire interior fence.	
Acres of existing windbreaks or shelterbelts Montana Note: Must be a minimum of 3 rows with 60% live species and no Fabricated structures allowed.	
Acres of soil that were once prairie (reference soil survey) Montana Note: See CSP 2013-1 Map.	
Acres in an organic system Montana Note: This is a certified system.	
Acres in a transition to organic system Montana Note: There must be a plan	
Acres of a pilot project that meet the State defined criteria Montana Note: This will be zero.	
Acres of critical area planting needed to address a resource concern	
Linear feet of fence needed to address a resource concern	
Linear feet of windbreak/shelterbelt establishment needed to address a resource concern	
Acres of fuelbreak needed to address a resource concern Montana Note: This is a forest practice.	
Acres of riparian herbaceous cover needed to address a resource concern	
Linear feet of firebreak needed to address a resource concern Montana Note: This is a non-forest practice	
Number of watering facilities needed to address a resource concern	
Total Rangeland acres
