Using Native Plants for Eagle Ford Shale Pipeline Restoration

A workshop on using native plants for pipeline restoration in the Eagle Ford Shale region will be held on Tues., Sept. 24 at 9 a.m. at the Dobie Ranch, County Road 233, in Live Oak County. RSVP by Sept. 22 to (361) 593-4037 or email: stn@tamuk.edu

As pipelines for the Eagle Ford Shale drilling continue to expand across Texas, restoration will be critical to ensure conservation of our natural resources and usable habitat for cattle and wildlife.

Topics to be covered:

- ✓ Native Seed Mix Selection, Procurement, and Planting
- ✓ USDA NRCS Ecological Site Descriptions
- ✓ Seedbed Preparation
- ✓ Native Seeding Trial Results from Area Right of Ways
- ✓ Brush & Weed Management
- ✓ Grazing Management after Seeding
- ✓ Native Plant Identification

CEU credits will be available with a \$10 fee payable to Texas AgriLife Extension Service.

The field day is a cooperative effort with the USDA-Natural Resources Conservation Service (NRCS), South Texas Natives, Texas A&M AgriLife Extension Service, Caesar Kleberg Wildlife Research Institute and the Live Oak Soil and Water Conservation District (SWCD).
