

**SUPPLEMENTAL WATERSHED AGREEMENT NO. IV
ELM CREEK (Cen-Tex) WATERSHED
Bell, Falls, McLennan, and Milam Counties, Texas
BY
EXCHANGE OF CORRESPONDENCE**

Since the original watershed agreement was signed on June 24, 1976, and subsequent supplements have been executed on February 21, 1979, February 17, 1993, and November 14, 1994, it has become necessary to modify that agreement to carry out the installation of the plan.

Now, therefore, the Secretary of Agriculture through the NRCS and the Sponsors hereby agree upon the following modifications of the terms, conditions, and stipulations of said watershed agreement, as supplemented:

Floodwater Retarding Structure (FRS) No. 9 is being deleted from the watershed work plan at the request of the sponsors. The planned site location for FRS No. 9 is located within the city of Temple's industrial park and the current landuser plans to install a stormwater detention pond in lieu of FRS No. 9. Landrights cannot be obtained and there are no alternative sites. The deletion of FRS No. 9 will result in a loss of approximately 0.79 square miles or a reduction of approximately one-half of one percent of the planned drainage area control for the Elm Creek Watershed. The flood protection benefits provided by the planned works of improvement to be deleted at the request of the sponsors are considered insignificant and will be foregone. Thirty-four of the forty-four planned FRS have been installed and are providing flood protection to the floodplain lands below the structures.

The Sponsoring Local Organizations and the Service further agree to all other terms, conditions, and stipulations of said watershed agreement not modified herein.

Central Texas Soil and Water Conservation District

Local Organization
