

SUPPLEMENTAL WATERSHED AGREEMENT NO. IV

FOR LAKEVIEW WATERSHED, TEXAS

by

EXCHANGE OF CORRESPONDENCE

Since the original Watershed Agreement was signed on the 27th day of August, 1969, and subsequent supplements since, it has become necessary to modify that agreement in order to facilitate the completion of the plan.

GSS Nos. 203 and 204 are no longer applicable to existing conditions. To treat the present problem would require an extensive system of dikes, a massive overfall structure, additional land rights and additional operation and maintenance requirements to handle the required design discharge.

GSS Nos. 203 and 204 are hereby deleted from the watershed plan.

Paragraph 3 of the watershed agreement is changed to read:

<u>Works of Improvement</u>	<u>Sponsoring Local Organization</u> (percent)	<u>SCS</u> (percent)	<u>Estimated Construction Cost</u> (dollars)
Three Grade stabilization structures	0.0	100.0	294,600

Paragraph 4 of the watershed agreement is changed to read:

<u>Works of Improvement</u>	<u>Sponsoring Local Organization</u> (percent)	<u>SCS</u> (percent)	<u>Estimated Installation Service Cost</u> (dollars)
Three Grade stabilization structures	0.0	100.0	87,025

(Updated price index: 1989)

All other terms, conditions and stipulations of the watershed agreement not modified here remain the same and are agreed to:

Signed:
