Plant Materials No. 41

Cover Crop Resources and Seed Vendors for Oregon and Washington

Compiled by

Annie Young-Mathews, NRCS Plant Materials Center, Corvallis, Oregon
Pamela Pavek, NRCS Plant Materials Center, Pullman, Washington

Soil health management is a growing concern for many farmers, ranchers, and land managers in Oregon and Washington. Cover crops can be an integral part of a soil health management system by adding plant diversity to a crop rotation. Cover crops have the potential to increase soil microbial diversity, feed the soil food web for a longer period, and provide plant residue which may help with soil moisture management, reducing temperatures, preventing surface crusting, and suppressing weeds. According to the NRCS Cover Crop Practice Standard (340), purposes of a cover crop include:

- Reduce erosion from wind and water.
- Increase soil organic matter content.
- Capture and recycle or redistribute nutrients in the soil profile.
- Promote biological nitrogen fixation and reduce energy use.
- Increase biodiversity.
- Pest and/or weed suppression.
- Soil moisture management.
- Reduce particulate emissions into the atmosphere.
- Minimize and reduce soil compaction.

The purpose of this Technical Note is to facilitate the use of cover crops in Oregon and Washington by providing a list of cover crop seed vendors for the Pacific Northwest, including sources of organic seed (Part A), and a list of reputable online resources for growers and conservationists to learn more about selecting, using, and managing cover crops in Oregon and Washington (Part B).

Part A. Cover Crop Seed Vendors for Oregon and Washington

Below is a list of cover crop seed vendors and wholesale seed companies serving Oregon and Washington.

Users of this list should note that this is only a partial listing of seed sources (retailers and wholesalers) for each state. If you find the information to be inaccurate, please contact Annie Young-Mathews at (541) 757-4812 or Anna.Young-Mathews@or.usda.gov, or Pamela Pavek at (509) 335-6894 or Pamela.Pavek@wa.usda.gov, with the accurate information so the list can be updated. This list does not constitute an endorsement of the vendors, nor does it guarantee the reliability or quality of products.
