

# Conservation Stewardship Program

## for Wildlife

**Have you ever looked across your land and thought about some operational management goals you would like to take to the next level? Maybe we can help.**

No one knows more about your land than you do, and no one knows more about conservation than we do. Together we can develop a plan tailored to your operation and your goals to help you increase productivity and protect the value of your land.

The Conservation Stewardship Program (CSP) offers an opportunity for ag producers to enhance enhance wildlife habitat while adopting conservation activities that can reduce energy use, improve soil health, and improve

water quality. CSP can help you plan and implement conservation practices and enhancements that address natural resource concerns on your operation.

### What's New?

Land owners and managers continue to benefit from all that CSP has to offer. There are a number of enhancements that benefit wildlife. Examples of enhancement options available to land owners and managers include planting trees and plants for wildlife food and cover, establishing wildlife corridors and water management activities that benefit wildlife.

The new CSP provides adaptive management options to better respond to market and weather conditions, allowing participants to choose enhancements, or bundles of enhancements, that best fit their unique circumstances.

### Is CSP for You?

CSP helps you build on your existing conservation efforts while strengthening your operation. Whether you are looking to improve Monarch butterfly habitat, install wildlife friendly fencing, or develop wildlife habitat, we can custom design a CSP plan to help you meet those goals. We can help you schedule timely planting of cover crops beneficial to insects, apply upland wildlife habitat management or manage riparian areas in a way that benefits wildlife habitat. If you are already taking steps to improve the condition of the land, chances are CSP can help you find new ways to meet your goals. CSP contracts are for five years, with the option to renew for another five years.

### Types of Assistance

NRCS provides free technical assistance to agricultural producers. To participate in CSP and receive financial assistance, producers must control or own the land and be in compliance with highly erodible land and wetland conservation requirements, and have current farm records with USDA Farm Service Agency. Learn more at [www.nrcs.usda.gov/farmbill](http://www.nrcs.usda.gov/farmbill).

### The Next Step

To learn more about CSP opportunities, producers should contact their local USDA service center and set up an appointment with NRCS staff. A [Local Service Center Directory](http://www.nrcs.usda.gov) is available online at [www.nrcs.usda.gov](http://www.nrcs.usda.gov), then click "Contact Us." You can also visit our CSP page online at [www.nrcs.usda.gov/CSP](http://www.nrcs.usda.gov/CSP).

CSP Enhancements for Wildlife

(This is not an exhaustive list.)

Cropland	Range/Pastureland	Forestland	Wetland Areas/Rice Fields
<ul style="list-style-type: none"> <li>• Monarch Butterfly Habitat</li> <li>• Wildlife Corridors</li> <li>• Pollinator and/or Beneficial Insect Habitat</li> <li>• Leave Standing Grain Crops to Benefit Wildlife</li> <li>• Pollinator and Beneficial Insect Habitat</li> <li>• Water Management for Wildlife Habitat</li> </ul>	<ul style="list-style-type: none"> <li>• Upland Wildlife Habitat Management</li> <li>• Pollinator and Beneficial Insect Habitat</li> <li>• Tree Planting for Wildlife Food and Cover</li> <li>• Wildlife Friendly Water Facility</li> <li>• Wildlife Friendly Fencing</li> </ul>	<ul style="list-style-type: none"> <li>• Upland Wildlife Habitat Management</li> <li>• Pollinator and Beneficial Insect Habitat</li> <li>• Riparian Forest Buffers</li> <li>• Tree Planting for Wildlife Food and Cover</li> <li>• Pine Straw Raking for Wildlife Habitat</li> </ul>	<ul style="list-style-type: none"> <li>• Renovate Shallow Water Habitat for Wildlife</li> <li>• Extend Periods of Soil Saturation or Shallow Ponding for Wildlife</li> <li>• Increase Riparian Filter Strips to Enhance Wildlife Habitat</li> <li>• Leave Standing Grain Crops Unharvested to Benefit Wildlife</li> <li>• Harvest Crops Using Methods that Allow Desires Species to Flush or Escape</li> <li>• Establish Conservation Cover for Pollinator and/or Beneficial Insect Habitat</li> <li>• Establish Monarch Butterfly Habitat</li> </ul>

# FAQ

## frequently asked questions

### How can I find out if I am eligible?

The best way to determine eligibility is to contact your [local field office](#). You must meet Adjusted Gross Income (AGI) requirements and have a Farm Tract Number with FSA. Land already enrolled in some USDA Farm Bill programs, such as CRP and some easement programs, may not be eligible.

### Is there a minimum number of acres needed

### to be enrolled?

No, but entire operation must be enrolled.

### Is there a minimum contract payment?

Yes, \$1,500 annually.

### What are “resource concerns?”

NRCS conservation specialists conduct resource inventories on agricultural land to evaluate natural resources including soil, water, air, plant, and animal resource bases to determine their condition. If there

is a cause or threat to that resource, that can result in what we refer to as a resource concern. Examples of resource concerns are erosion, degraded water quality, and plant health.

### What are “enhancements?”

Enhancements are management activities that go above and beyond the minimum practice requirements helping the producer achieve a higher level of conservation.

### What are “bundles?”

Bundles are suites of conservation enhancements designed to address multiple resource concerns. Bundle options are offered at a higher payment rate.

### Do I have options to pick the enhancements that are best suited for my operation?

Yes. The variety of CSP practices that are offered give you a lot of freedom to select enhancements that help you meet your management goals.
