

Wisconsin FY23 Environmental Quality Incentives Program

Workload Prioritization Tool: **Drumlin Moraine - Cropland**

A Workload Prioritization Tool must be completed for each eligible EOIP application.

Instructions:

This workload prioritization tool must be completed for each eligible producer applying for this EQIP fund pool. Applications will be accepted on a continuous basis; however, application periods are established for purposes of evaluation, ranking, and funding decisions. The goal of this workload prioritization tool is to ensure that conservation technical assistance and the EQIP program benefits are managed efficiently to address priority conservation needs related to this initiative.

Completion of this worksheet and documentation does not constitute agreement to provide EQIP program benefits nor approval of a program contract. The original workload prioritization tool should be filed with the applicant case file or EQIP program file and unless the application is determined to be ineligible, the workload priority (high, medium, or low) must be recorded in ProTracts. Upon request, a copy of any completed workload prioritization tool may be provided to the applicant.

Detailed Workload Prioritization Tool – Complete for Each Eligible EQIP Applicant	
Applicant Name:	County:
Application No: 745F4823	Field Office:
Evaluator Name:	Date:
Priority Determination for ProTracts – Select One:	
<p><u>High Priority Category:</u></p> <ul style="list-style-type: none"> This application includes at least 1 of the LWG fund pool priority Practices; 412 Grassed Waterway, 580 Streambank Restoration, 638 Water and Sediment Control Basin, 410 Grade Stabilization, 329 Residue and Tillage Management - No-Till/Strip-Till, 393 Filter Strip, 386 Field Border, 327 Conservation Cover, 342 Critical Area Planting, 512 Pasture and Hayland Planting, where the practices are needed as the PRIMARY practice to address the following resource concerns: Soil Erosion, Soil Degradation, or Surface Water Quality Resource Concerns. If 420 Wildlife Habitat Planting is planned with the application, it will have a SECONDARY resource concern to address Surface Water Quality, Soil Erosion or Soil Degradation. <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> This Application is for High Tunnel System (325) as the primary practice: <p>AND</p> <ul style="list-style-type: none"> - At least 40% of the products grown inside the tunnel will be sold/donated within 60 miles of the site (document with 6 notes) 	High
<p><u>Medium Priority Category:</u></p> <p>The application includes any practice that addresses Soil Erosion, Soil Degradation, or Surface Water Quality Resource Concerns.</p>	Medium
<p><u>Low Priority Category:</u></p> <p>All applications that do not qualify as “high” or “medium” priority</p>	Low

The priority determination of high, medium, or low must be recorded in ProTracts for this applicant.
