

#### **CONSERVATION ENHANCEMENT ACTIVITY**

#### E328K

# Multiple crop types to benefit wildlife

**Conservation Practice 328: Conservation Cropping System** 

APPLICABLE LAND USE: Crop (Annual & Mixed)

**RESOURCE CONCERN: Animals** 

**ENHANCEMENT LIFE SPAN: 1 year** 

#### **Enhancement Description**

Alternating crops in a systematic arrangement of strips across a field to provide diverse rotations of crops that provide wildlife food. At least two crops will be planted in adjacent strips a minimum of 0.5 acres in size.

#### **Criteria**

- If the field is currently divided and planted to more than one crop, further division would be required.
- The crop rotation must include a minimum of two different crops in a minimum three-year rotation. <REFER TO STATE SPECIFIC LIST OF WILDLIFE FOOD FRIENDLY CROPS>
- Crop strips will be a minimum of 0.5 acres in size not to exceed 40 acres. Grazing of crop residues and cover crops are permissible provided 60 percent cover remains after grazing.
- Annual crop strips will be rotated each year. If annual crops are used in conjunction
  with perennial crops, only that annual crop type would change the following year or
  growing season.

# SOUTH DAKOTA (SD) SUPPLEMENT TO CONSERVATION ENHANCEMENT ACTIVITY

#### E328K

#### **Additional Criteria for SD:**

In addition to the criteria specified in the national job sheet E328K, the following additional criteria apply in SD:

- No fall tillage.
- Any annually planted commodity crop in which the crop residue is left standing over winter, is adequate for wildlife.
- In SD, the approved habitat evaluation guide is the Wildlife Habitat Quality Rating Worksheet, SD-CPA-19 (WHEG).
