

Oregon's Natural Resources Conservation Service Regional Conservation Partnership Program

From 2015 to 2022

The information on this handout represents Oregon's RCPP data from 2015-2022.

NRCS Oregon invested over \$60M

Worked with 200 partner organizations

Worked on over 200,000 acres

Partners contributed over \$100M

600 landowner contracts

The Four Pillars of RCPP

IMPACT

Partnership projects produce a collective impact that no single organization can achieve alone

INNOVATION

Large-scale conservation challenges require creative solutions

PARTNER CONTRIBUTIONS

NRCS contributes 50% of resources, partners contribute the other 50%

COLLABORATION

Working together from start to finish is key to successful collaboration

Through the Regional Conservation Partnership Program (RCPP), NRCS and partners work together to invest in and amplify regional conservation investments.

RCPP Project Locations

Forest Health

Waterfowl

Salmon & Native Fish Habitat

Invasive Plants

Upland Habitat

Irrigation Modernization

Successful RCPPs start at the local level.
Visit www.or.nrcs.usda.gov to contact your local field office and start the process.

The information on this handout represents Oregon's RCPP data from 2015-2022.

Oregon's RCPP Highlights

4,000 acres
of restored oak
woodland
habitat

5,000 acres of
restored wetland
habitat

Installed **25** miles
of irrigation
pipeline

Reduced wildfire
risks on
300,000 acres

Innovation in
Carbon Markets
for small forest
landowners

Enrolled
23,000 acres
in conservation
easements

35 stream miles
restored

Thousands of
riparian areas
restored or
protected

USDA is an equal opportunity provider, employer and lender.
