Trimble T10 - Updating Windows 10

<u>Overview:</u> The Trimble T10 tablet utilizes the Windows 10 operating system. The user needs to go through steps to update the operating system via the cellular connection. Simple updates may take 15 minutes, but extensive ones might take an hour or more. Be sure that you have an adequate battery level or plug your tablet into AC power.

Updating Windows 10

- 1. After turning the T10 tablet open up Microsoft Edge to verify that the cellular connection is active.
- 2. Once you have verified your cellular connection click *Start... Settings....* Maximize this screen if isn't already full screen.
- 3. Click *Update & Security* and you will see the Windows Update screen showing what updates are available.

6. After the updates are ready to be installed you may be informed that a restart is required. Click Restart Now.

- 4. If updates are showing up as available click Download
- 5. The Status of an update includes items such as: -Pending Download
 - Downloading
 - Pending install
 - Installing
 - -Pending Restart

(KB4532938)

Status: Pending install

2020-01 Cumulative Update for Windows 10 Status: Installing - 100%

Windows Malicious Software Removal Tool x **Status:** Pending install

- Once the T10 tablet has restarted check to see if there any additional updates. Click *Start*... *Settings*...
- 8. Click *Update & Security* and you will see the Windows Update screen showing whether more updates are available.
- 9. Repeat steps 4-8.
- 10. Even if it says **You're up to date** go ahead and click *Check for Updates* one additional time.
