

**KANSAS SUPPLEMENT TO
CONSERVATION ENHANCEMENT ACTIVITY**

**CONSERVATION
STEWARDSHIP
PROGRAM**

E381A

Silvopasture to improve wildlife habitat

Additional Criteria for Kansas

- Develop a Forest Stewardship Plan (FSP) to inventory existing vegetation to determine management of the resource. Through NRCS, a Kansas Forest Service (KFS) district forester may be requested to complete a FSP and to assist the producer with practice planning.
- Use the CART national wildlife questions for the appropriate land use to meet the WHEG requirement for this enhancement. In order to convert to a WHEG score, take the CART score and divide by 100. For example: CART score = 50, WHEG score would be calculated $(50/100) = 0.50$.
- Refer to Kansas Conservation Practice Standard 528, Prescribed Grazing, Construction Specifications, for development of a grazing plan.
- Refer to Kansas Conservation Practice Standard 381, Silvopasture Establishment, for practice establishment assistance.

Additional Documentation Requirements for Kansas

- Certification that the application of grass and/or trees meet design requirements of Form KS-ECS-4, Grass Seeding, and/or Form KS-ECS-5, Tree/Shrub Planting.
