

**KANSAS SUPPLEMENT TO
CONSERVATION ENHANCEMENT ACTIVITY
E666G**

**CONSERVATION
STEWARDSHIP
PROGRAM**

**Reduce forest density and manage understory along roads
to limit wildfire risk and improve habitat**

Additional Criteria for Kansas

In addition to the criteria specified in National Enhancement E666135Z2, the following apply in Kansas:

- Develop a Forest Stewardship Plan (FSP) to inventory existing vegetation to determine management of the resource. Through NRCS, a Kansas Forest Service (KFS) district forester may be requested to complete a FSP and to assist the producer with practice planning.
- Refer to [Kansas Conservation Practice Standard 666](#), Forest Stand Improvement, Construction Specifications, for methods to kill trees.
- Refer to [Kansas Conservation Practice Standard 660](#), Tree/Shrub Pruning, Construction Specifications, for methods and guidance to proper tree pruning.
- A prescribed burning plan will be developed if burning is used for maintenance of herbaceous plants. Prescribed burning will also be identified in the FSP.

Additional Documentation Requirements for Kansas

In addition to the documentation requirements specified in National Enhancement E666G, the following applies in Kansas:

- A detailed map identifying locations of forest stand improvement activities using a Global Positioning System (GPS) unit meeting NRCS specifications will be included with planning documentation.
