

Lower San Pitch Watershed Plan-EA Project - Sanpete County Utah

Scoping Notice - Fact Sheet

Project Information

The United States Department of Agriculture Natural Resources Conservation Service (USDA-NRCS), with assistance of the Sanpete Water Conservancy District as the project sponsor, is considering proposed improvements within the Lower San Pitch River Watershed. The proposed improvements include stabilization of Twelvemile Creek to reduce suspended sediment, lining of a Gunnison Irrigation Company canal to eliminate seepage, and construction of a water storage reservoir. The improvements under consideration will address watershed protection and agricultural water management.

USDA-NRCS will hold an online public meeting to provide information about the proposed project and to collect comments. Technical studies are scheduled to take place during the summer of 2021, with a Draft Plan-EA circulated to the public and agencies for review in early 2022.

At this time, USDA-NRCS is requesting comments on the project to identify issues and resource sensitivities. Written comments can be submitted during the open period starting November 5, 2020, and ending on December 5, 2020. Comments must be post-marked by December 5, 2020.

Additional information can be found at the USDA-NRCS project website:
