

# “C” Canal Water Efficiency Project for the Lower Sevier River Watershed – Millard County, UT

## Scoping Notice

### Project Information

The United States Department of Agriculture - Natural Resources Conservation Service (NRCS), with assistance from Delta City and DMAD (project sponsors), is considering improvements along the “C” Canal within the proposed Lower Sevier River Watershed. Improvements are proposed to reduce water loss from leakage and evapotranspiration and to improve public safety along the “C” Canal in Delta, Utah.

An evaluation of potential project alternatives and associated environmental impacts is required to comply with the National Environmental Policy Act and the Council of Environmental Quality’s regulations and will be documented in the form of a Watershed Plan and Environmental Assessment (Plan-EA). NRCS, Delta City, and DMAD will hold a public scoping meeting to provide information about the proposed project and to collect comments.

At this time, NRCS is requesting comments on the project to identify issues and resource sensitivities. Written comments can be submitted during the open comment period starting January 5, 2022 and ending on February 4, 2022.

**Written comments must be received by:**

**February 4, 2022**

Additional information can be found at the NRCS Lower Sevier River Watershed website accessed from:
