### \*Reference Title 440 Part 530, Subpart E, section 530.41 A (1) and C(2), which state:

A. Preapproval of Applications.—When NRCS selects an application for funding as described in subpart D, “Application Processing,” of this manual, the State program manager, or others with delegated authority and appropriate business tool permissions, will—

(1) Set the application status to “preapproved” and use subpart O, exhibit 530.141C, “Intent to Proceed Letter,” of this manual, to notify the applicant. NRCS field staff uses this letter, along with subpart O, exhibit 530.142E, “Conservation Program Application Checklist” of this manual to—

- (i) notify an applicant that NRCS ranked their application high enough for funding consideration and determine their interest in moving forward with a contract; and
- (ii) provide the applicant an opportunity to finalize their eligibility and to request any other documentation needed for contract development.

**Note:** When a State has previously notified an applicant about preapproval and the applicant has provided all required contract-development documentation, the State does not need to send the “Intent to Proceed” letter. However, the State must have documentation to support this decision in the case file.

### C. Approval of Applications

(2)\_ NRCS field office staff **will use** subpart O, exhibit 530.141F, “Application Approval Letter,” of this manual to notify the applicant that NRCS approved their application and to provide the applicant an opportunity to review all contract documents prior to signing and returning the documents to NRCS.
