	The applicant will install cross fence to establish or enhance a prescribed grazing system where pastures are allowed to rest at least 80% of the grazing cycle on more than half of all the grazing lands offered acres. (minimum of 5 paddocks)	150
	The applicant will install cross fence to establish or enhance a prescribed grazing system where pastures are allowed to rest at least 66% of the grazing cycle on more than half of all the grazing lands offered acres. (minimum of 3 paddocks)	130
	The applicant will establish and maintain at least twenty percent (maximum of 20 acres to be established or whichever is less) of grazeable acres of native warm season grasses as part of a prescribed grazing system. Grasses include one or more of the following: switchgrass, eastern Gama grass, big bluestem, little bluestem, or Indian grass.	190

	The applicant will treat all critically eroding areas in the offered fields in pasture, hayland, silvopasture.	175
	The applicant will install a water source for livestock water to facilitate prescribed grazing?	110
	The applicant will establish heavy use area protection (HUA) for areas that have been damaged by livestock. Examples: existing watering facilities or ponds without HUA, or static feeding areas. Livestock will be fenced from pond(s) except at site of HUA livestock entrance. This should not be used for MAINTENANCE of existing HUAs. (Do not select if implementing new watering facility)	90
